

QA22 Dual Ear Headworn Microphone

Superior sound, rock solid adjustable boom mounting, discreet look and size, detachable parts for easy replacement, folds flat for transport and storage

Trusted Performance

Que Audio's QA22 Dual Ear Headworn Mic was designed to provide superior sound, secure mounting, and rugged durability, when only a dual-ear head mounted mic system will suffice.

The exceptional sound quality of the QA22 is the result of its 2.5mm European micro condenser capsule delivering the same trusted, high-end, water resistant, full frequency, superlative audio quality since 2008. (The QA22 sports the same microphone capsule as designed for the widely used DA12 Headworn Mic.)

The extremely small size of the capsule makes it inconspicuous and easy to position, while it's big clear sound, and high SPL characteristics deliver the presentation and performance expected from a top of the line headworn microphone. Perfect for church pastors, theater actors and singers, sportscasters, on-air or video talent, aerobics instructors, presenters, in the boardroom, and anywhere a dual ear headworn mic is demanded.

- **Award winning 2.5mm full-bandwidth water resistant micro capsule**
- **Superb audio quality**
- **Rock solid boom mounting while retaining a discrete look**
- **Fully adjustable headband and boom arm**
- **Replaceable Boom Arm (mic capsule/boom arm)**
- **Replaceable Headband**
- **Replaceable Ear Cushions (pair)**
- **Replaceable Cable**
- **Packs flat for compact shipping and safe easy storage**
- **Also includes windscreens (2), tie clip, and zip pouch**
- **Q Connectors sold separately for most 3rd party wireless devices**

Specifications: QA22
Element: Back Electret Condenser
Polar Pattern: Omnidirectional
Frequency Response: 20Hz-20Khz
Sensitivity: -45dB ±3dB
Output impedance: 2K ohms ± 30%
SPL max: 140dB
Operating voltage: 0.9V (optimal) – 5V (maximum)
Cable: 1.4mm * 1.8m
Weight: 1g (W/O cable and connector)
Mic Dimension: 3.5mm
*Specifications subject to change without notice

Que Audio Warranty Description: Electronic or electrical components of all Que manufactured goods are supplied with a twelve (12) month repair or replacement warranty to the original end user only, and non electronic/electrical components are supplied with a twelve (12) month repair or replacement warranty to the original end user.
