

DigiSign MXC

500799-1080P

HDMI

Multi-view

H.264/5

RJ45

Overview

The DigiSign MXC (model 500799-1080P) is capable of playing multiple audio/video signage content simultaneously in a multiview window up to 1080p at 60Hz from a local network, the Internet, or player internal memory, and supports multiview capability including multiple 1080p videos and supports a scheduler to automatically deliver the windowed audio/video content based on a yearly schedule. Multiple video, audio and image file formats are supported. The unit delivers 1080p at 60Hz content to a display or to a MuxLab AV over IP system to be distributed to multiple displays and video wall arrangements. The Player supports a Keyword Dictionary and Interactive Mode.

The DigiSign MXC is managed by the DigiSign CMS (Content Management System) Software running on a PC, which supports video, audio and image content as well as HTML5, RSS feeds and many other widgets. DigiSign CMS can easily and quickly create digital signage content and schedule the content to be played on the Player.

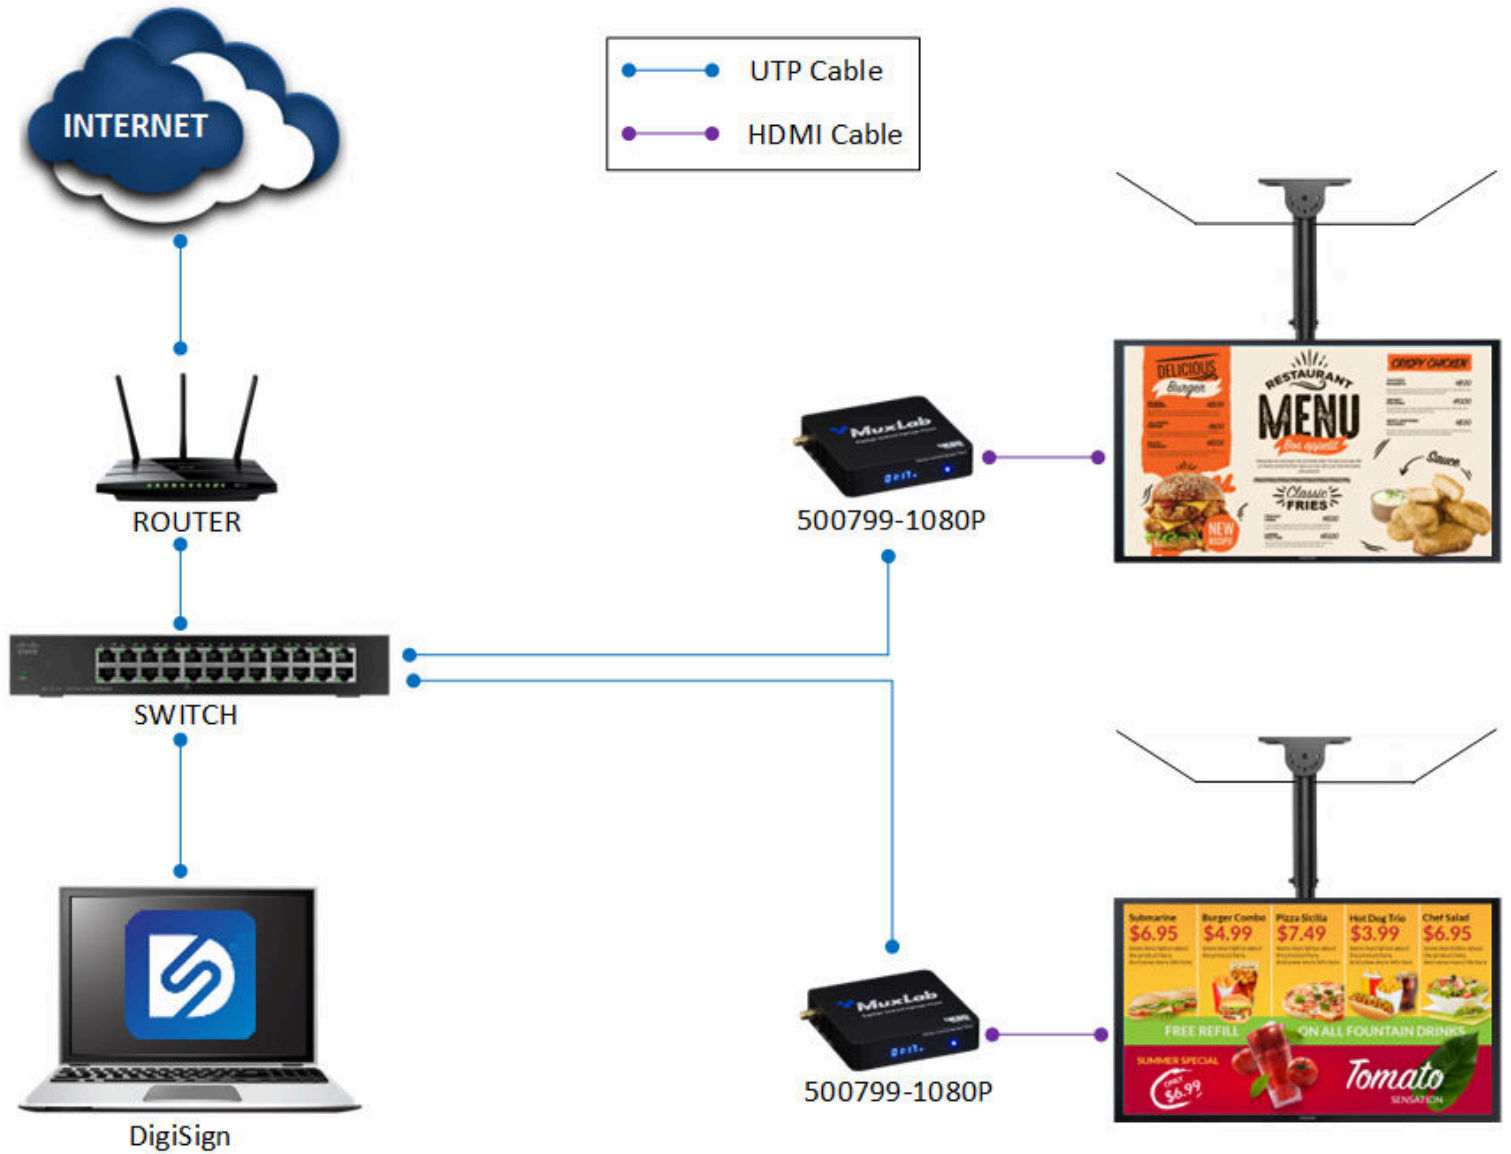

Applications

- Digital signage / Media player
- Audio/Video Streaming over LAN and Internet
- Commercial and residential AV systems
- Corporate lobbies, malls and boutiques, airports, subway/train/bus stations, etc.
